

CHALLENGER LMS

This machine has been developed to bale woodshavings or similar materials into heavy duty plastic bags. As with all Challenger LMS machines, the 200 kg Woodshaving Baler offers excellent build quality to provide reliable operation for a number of years. The standard machine can be supplied with a variety of feed conveyors and hoppers to suit the application.

200 kg Woodshaving Baler

SPECIFICATION :

BALE SIZE	-	Approximately 750 x 1100 x 1100 mm
BALE MASS	-	Approximately 200 kg (dep. on material)
THROUGHPUT	-	40 bales per hour
BAG	-	Heavy duty plastic bag
FEED HOPPER	-	1100 mm long x 900 mm wide (standard)
RAM FORCE	-	45 tonnes
HYDRAULIC DRIVE	-	22 kW, 400/3/50 VAC
L x W x H (standard hopper)	-	5200 x 1200 x 5700 mm
MACHINE MASS	-	6.0 tonnes

FEATURES :

- Fully automatic baling cycle with high efficiency hydraulic power unit
- Floating compression rams and full compliance to CE regulations
- No special foundations are required
