

**A second hand 25 kg Baler for woodshavings fitted with three hoppers and with an adjustable volumetric measuring device is for sale.**

A high-speed form, fill and seal Baler replaced this machine in June 2009 and it was fully operational when removed from service.

Woodshavings are fed into a hopper at the top of the Baler where it is stored and automatically falls by gravity in to the bale chamber as the machine cycles. The machine produces a 25 kg nominal mass bale of woodshavings and is fitted with a readily adjustable volumetric measuring device.

The machine is powered by an integral 22 kW, 400/3/50 VAC electro hydraulic power unit and is capable of producing approximately 110 bales per hour.

The machine was originally manufactured by Challenger circa 2001, has been well maintained by the previous owner and the machine can currently be viewed in a pre-reconditioned condition if required.

- Price** - £ 14,950 net, ex works, sold as seen  
or from £ 19,250 net, ex works Hull, once factory refurbished  
or brand new from £ 27,370 net, ex works Hull
- Lead-time** - Our refurbishment lead-time is approx. 4 / 6 working weeks
