

**A Challenger mass measured 7 - 10 kg Pet Pack Baler for
Wood shavings / woodchips / chopped straw**

This machinery was purchased in 2003 along with a Challenger 25kg volumetric baler for baling wood chips. The owners soon realised that the majority of their business would be 25kg bales and the pet pack baler was mothballed, having only produced approximately 5500 bales and is in very good condition.

Challenger are currently manufacturing a 20kg mass measured baler with an automatic form, fill and seal bag former for this client

The bale weight can be easily adjusted via a digital controller mounted in the door of the control panel.

The equipment on offer includes;

- Challenger Mass Measured Pet Pack Baler
- Starter control panel.
- Shear blades

All of this equipment can currently be viewed at our works.

Price - £ 14,550,00 net, ex works, as seen
