

AUTOMATIC DOUBLE ENDED CHIMBER

The Challenger Drumtech Automatic Double ended Chimber is designed to reform and seal chimbs of standard 205 litre capacity steel drums.

The chimbing rollers automatically engage with the drum in position and cater for most sizes down to remakes. It is fully automatic with an in feed and discharge device for a horizontal roll-through operation and all functions are controlled by a process timer.

Technical Information

Production rate	100 drums per hour
Electrical supply	400/3/50 VAC
Environmental protection	IP55
Power requirement	5.0 kW
Compressed air pressure	4.5 Bar
Dimensions	2.5 m by 1.4 m by 1.2 m
