

CAROUSEL HOT AIR DRYER

The Challenger Drumtech Carousel Hot Air Dryer is designed to give a controlled internal hot air drying treatment in order to ensure optimum dryness inside the drum.

The machine is very simple to operate with the rotating arrangement indexed pneumatically by a single foot pedal.

Jetting is provided by a high capacity centrifugal type fan coupled to a multi-stage steam coil heat exchanger.

Technical Information

Production rate	100 drums per hour
Electrical supply	400/3/50 VAC
Environmental protection	IP55
Power requirement	1.5 kW
Compressed air pressure	5.5 Bar
Steam pressure	7 Bar
