

A used Ken Mills animal bedding baling system.

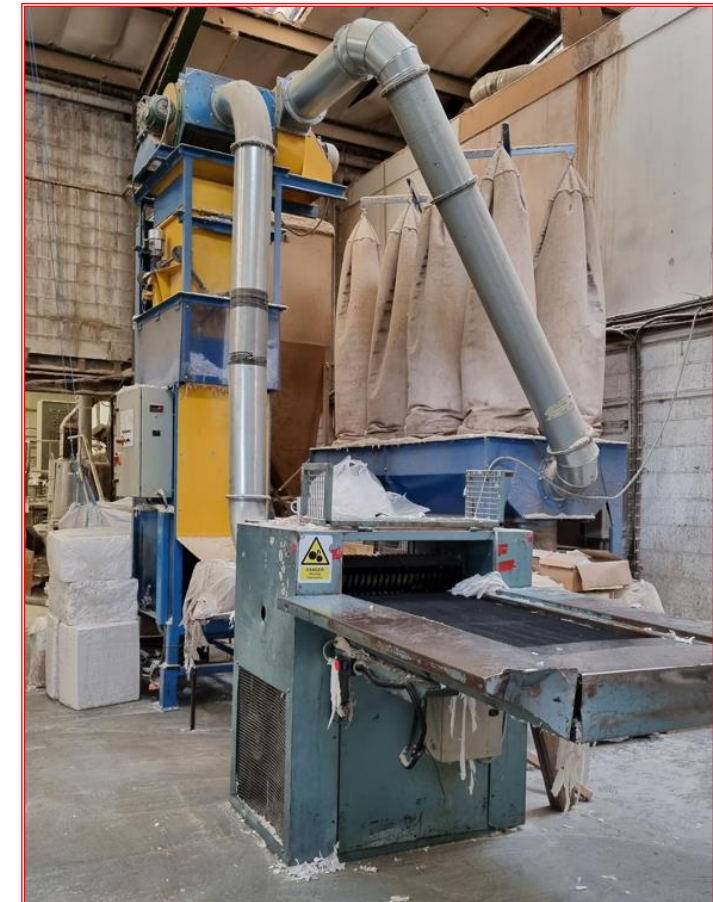

This system consists of a Ken Mills manufactured baler supplied with dust extraction system and complete with dust bag collection station.

The system has predominately been used for the baling of shredded teabag material and is therefore supplied with the hand fed shredding unit as shown in the photo below. The Material is delivered to the baler inlet by the fan located on the top of the machine via the ducting arrangement shown.

The baler is supplied with a local control panel as shown and is complete with a hydraulic power pack and with all interconnecting hoses.

The baler is currently producing 14kg nominal bales of teabag material but would be suitable for baler other products.

Nominal bale dimensions are – 305mm wide x 470mm high x 600mm long.

**Price - £ 18,000.00 ex VAT, ex works, sold as seen.
