

## A used 1kg Baling System manufactured by Ploppspan (Holland).

The system includes:

- Automatic baler producing a 1kg, 115mm wide x 100mm high x 350mm long nominal bale. The baler is capable of producing a nominal throughput rate of 1000 bales per hour.
- An automatic bag loading and sealing system is integrated into the line.
- A bale accumulation and stacking device is provided within the system to provide small batches of baled product as illustrated in the photo below:
- An orbital wrapper also shown below is included and integrated into the system allowing small batches to be produced.
- Accumulation gravity roller conveyor is supplied with the system.
- The system is operated from the local control panels provided.

**Price - £ 45,000.00 ex VAT, ex works, sold as seen.  
(Reasonable offers will be considered)**
