

Two - Used twin screw conveyor assemblies.

The conveyors were originally designed and manufactured by Challenger handling in circa 2021 to the following outline specification:

- Heavy duty mild steel casing and auger assembly.
- Each auger assembly is made up with a 60.3mm diameter centre tube fitted with 210mm diameter x 210mm pitch x 6mm thick mild steel flights.
- Auger assemblies are fitted with mild steel stub shafts supported between 50mm diameter 4-hole flanged bearing assemblies.
- Internal conveyor width is 470mm nominal.
- Operating conveyor length is 2250mm nominal.
- Each conveyor is powered by two 2.2kw shaft mounted geared motor units.

Price - £3,500.00 each ex-VAT, ex works, sold as seen.

***Sold individually or as a pair*. (Reasonable offers will be considered).**
