

## LEAK DETECTOR

The Challenger Drumtech Leak Detector will handle standard 205 litre capacity steel drums, which are clean and dry in line with International quality control requirements.

It is fully automatic in operation, has a rejection feature to handle failed containers and whilst it has a fully enclosed sensing area, an inspection window is included for operator convenience.

### Technical Information

Production rate	100 drums per hour
Electrical supply	400/3/50 VAC
Environmental protection	IP55
Power requirement	1.1 kW
Compressed air pressure	4.5 Bar
Dimensions	2.0 m by 1.3 m by 2.1 m
