

Drum Cabinet Washer.

A Challenger Handling Ltd manufactured drum cabinet washer for internally cleaning drums / containers up to 205 litre capacity.

The machine consists of a Hot or cold-water recirculated wash (Wash detergent can be added) on the RHS loading position and a fresh cold-water rinse on the LHS loading position. Either 2 smaller drums / containers or one larger drum / container can be positioned at each loading station.

The recirculated water holding tank, freshwater rinse tank, enclosure and interconnecting pipework are all manufactured from grade 304 stainless steel.

Operation is from the local control panel included and allow the following functions:

- Start, Stop and E-stop
- Adjustable wash timer
- Selectable front jet / back jet (2 or 4 containers)
- Selectable wash only, rinse only or wash and rinse cycles.

All operations are controlled by the pumps and process valves mounted to the rear of the machine.

Services Required:

400 Volt / 3 Phase mains supply.
Mains water supply.
