

DRUM EXPANDER

The Challenger Drumtech Expander is a stand-alone machine and is semi-automatic in operation.

It has been designed with a series of heavy-duty formers to mechanically expand inside standard open top 205-litre capacity steel drums to remove dents in the drums' circumference.

The machine has an integral electric motor driven hydraulic power unit.

Technical Information

Production rate	60 drums per hour
Electrical supply	400/3/50 VAC
Environmental protection	IP55
Power requirement	7.5 kW
