

DRUM SCRUBBER – EXTERNAL ONLY.

The Challenger scrubber is designed to scrub the external faces only of standard 205 litre plastic drums and includes the following features.

- Recirculated wash pump and associated process valves.
- Large capacity water holding tank c/w steam heated coil.
- Twin powered heavy duty cleaning brushes.
- Stainless steel canopies covering the washing zone.
- Local operator control panel.
- External surface spray bar.
- Rolling rail infeed and outfeed to a fixed end stop.

The scrubber requires the following services:

- 3 phase mains supply to the local control panel.
- Steam supply to the coil provide. (Electric version available on request).
- Mains fresh water supply to the holding tank.

All equipment is manufactured to order at our manufacturing facility based in Kingston upon Hull (UK).

We are happy to look at more bespoke requirements if required.
