

AUTOMATIC AIR DE-DENTER

The Challenger Drumtech Automatic Air De-denter is designed to de-dent standard 205 litre capacity steel drums.

It is a fully automatic machine with an in feed and discharge for a horizontal roll-through operation. The doors are interlocked so that operation will not proceed unless both of the doors are closed.

Technical Information

Production rate	100 drums per hour
Electrical supply	400/3/50 VAC
Environmental protection	IP55
Power requirement	4.0 kW
Compressed air pressure	4.5 Bar
Dimensions	1.7 m by 2.8 m by 1.8 m
