

A used Satrind 3K10/80 industrial shredder is for sale

This is a three-shaft industrial shredder which is part driven by an electric motor and part driven by a hydraulic motor. The two main shafts are electric motor driven that try to process the material through a screen and anything that does not go through the screen is fed back round by the third, hydraulically driven shaft.

The shredder was originally manufactured circa 2004 and the basic specification is believed to be;

- 1,010 mm long by 800 mm wide cutting chamber
- 22 kW, 400/3/50 VAC electric motor
- 37 kW, 400/3/50 VAC hydraulic power unit
- 5,500 kg cutting chamber weight
- Support stand
- Hopper (just the one above the shredder head)
- Control panel
- Hydraulic power unit
- 200 litre oil tank capacity
- 1,000 kg hydraulic power unit weight

NB: the infeed belt conveyor assembly, the discharge screw Conveyor assembly and safe access platform are not for sale.

This shredder is in need of some “tender loving care” and is priced accordingly;

Price - £ 7,500 ex VAT, ex works, sold as seen and all interested parties should contact admin@challenger-group.co.uk
